# Educational Copilot - UI Documentation

1. Introduction

This document provides a detailed UI guideline for creating an AI-driven educational platform, drawing inspiration from Education Copilot. It encompasses explanations of each feature, UI components, and includes screenshots for reference.

2. Landing Page

Objective:
Introduce users to the platform, highlighting its benefits and encouraging sign-ups.
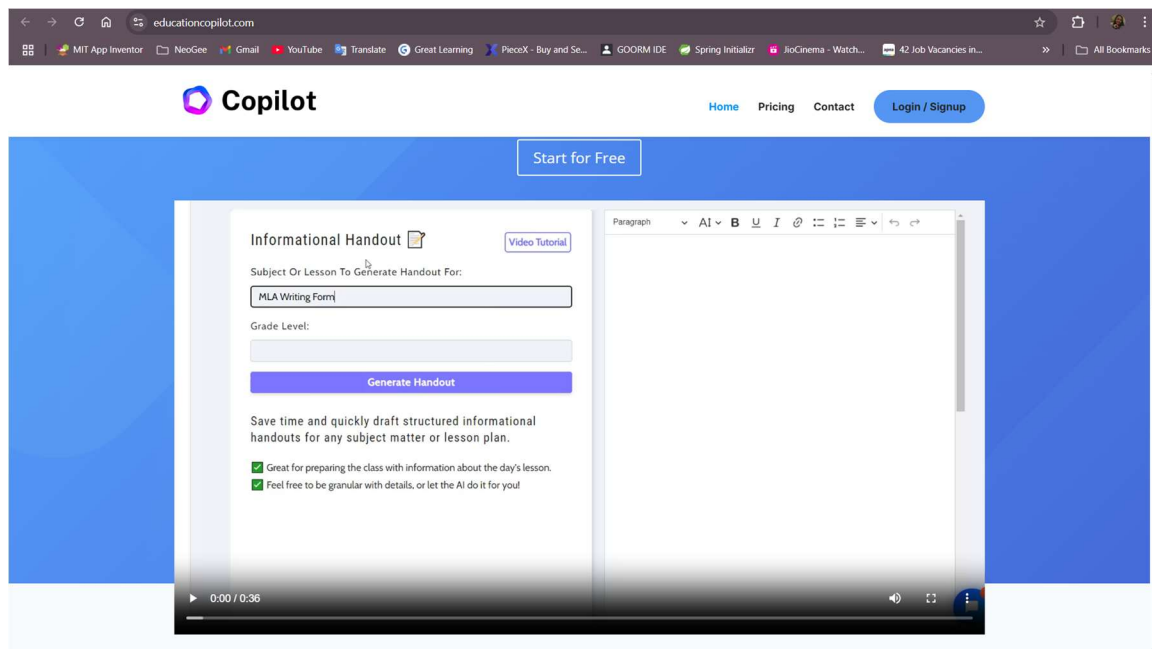

Key Features:
- Hero Section: A compelling headline with a brief description and a 'Start for Free' button.
- Language Support: Indicates support for English & Spanish.
- User Base Highlight: Mentions the number of teachers already using the platform.

Our Mission

Our mission is to provide educators with high–quality, AI-generated templates and resources that streamline lesson planning and preparation.
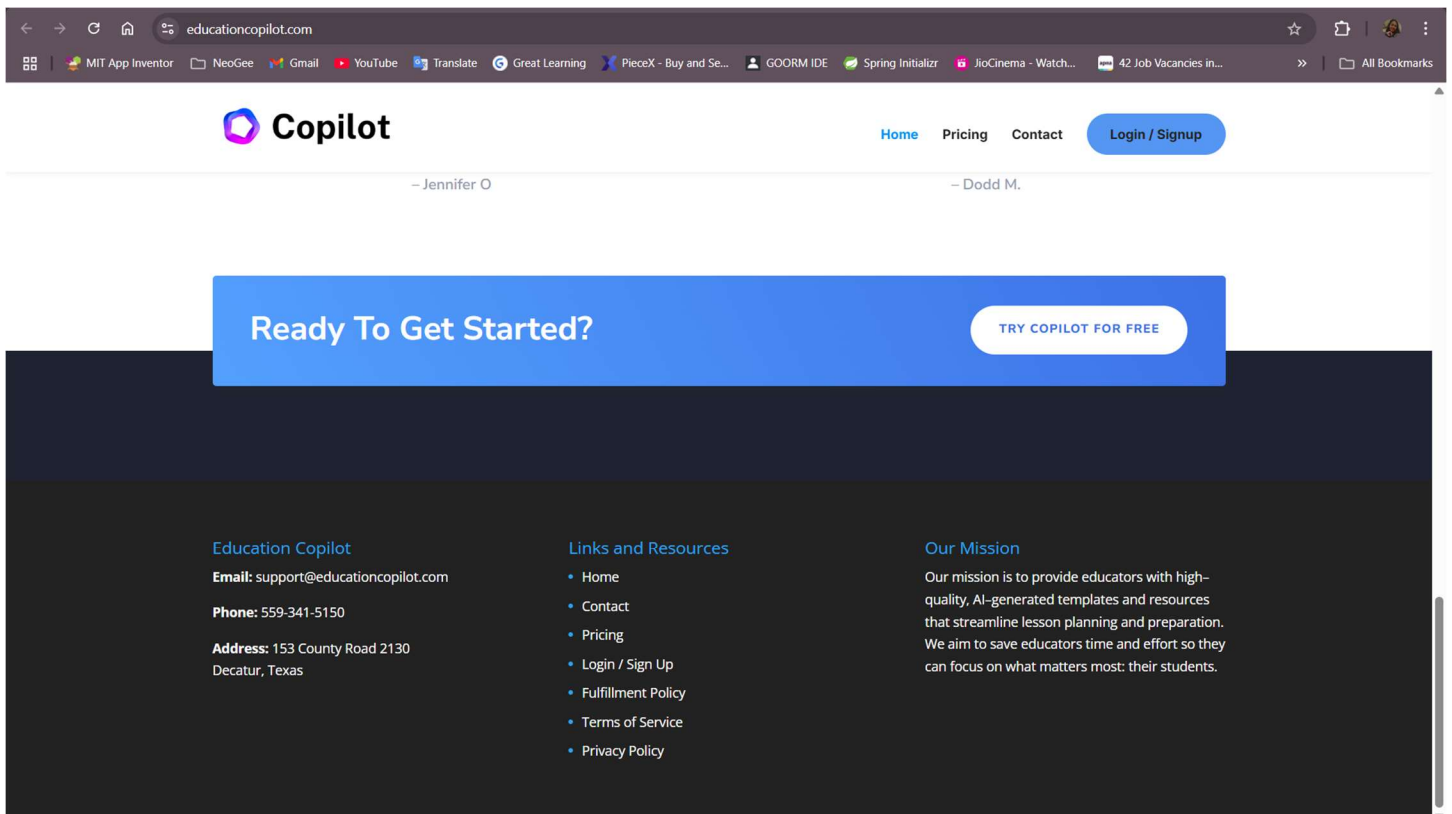

Design Elements:
- Clean, modern layout with intuitive navigation.
- Consistent color schemes and typography.

3. User Authentication

Objective:

Enable users to create accounts and log in to access personalized features.
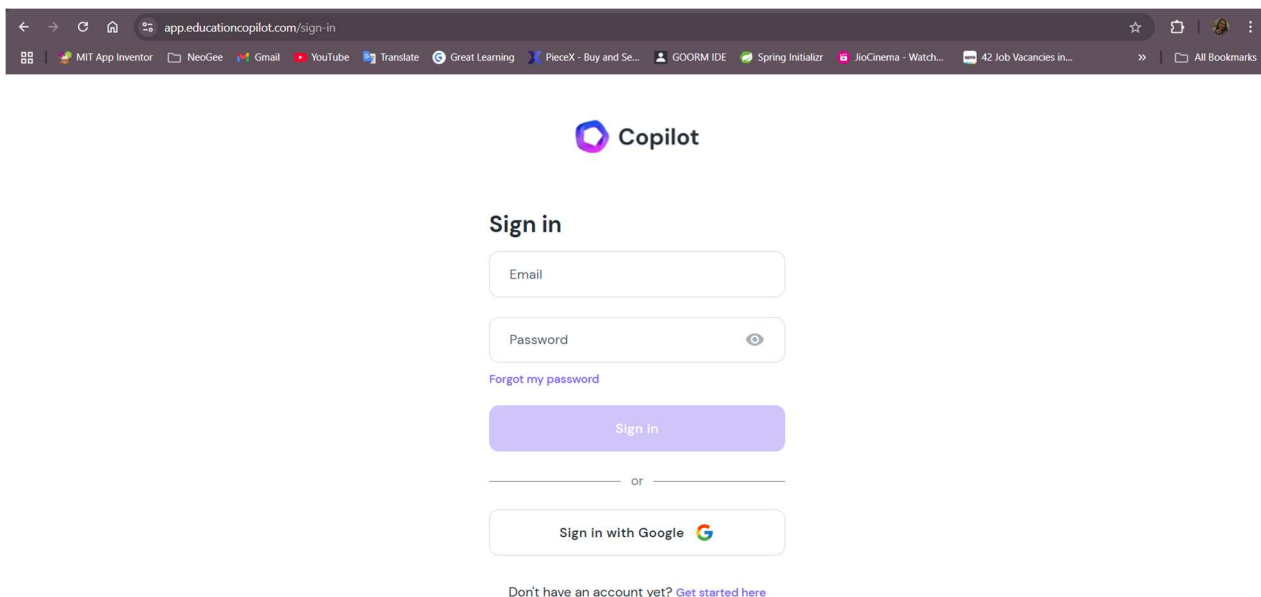

Key Features:
- Sign Up/Login Forms: Simple registration with email or social media accounts.
- Password Recovery: Assists users in retrieving or resetting their passwords.

Design Elements:
- Minimalistic form design with clear input fields.
- Responsive design for accessibility.

4. Dashboard

Objective:

Provide an overview of user activities and quick access to features.
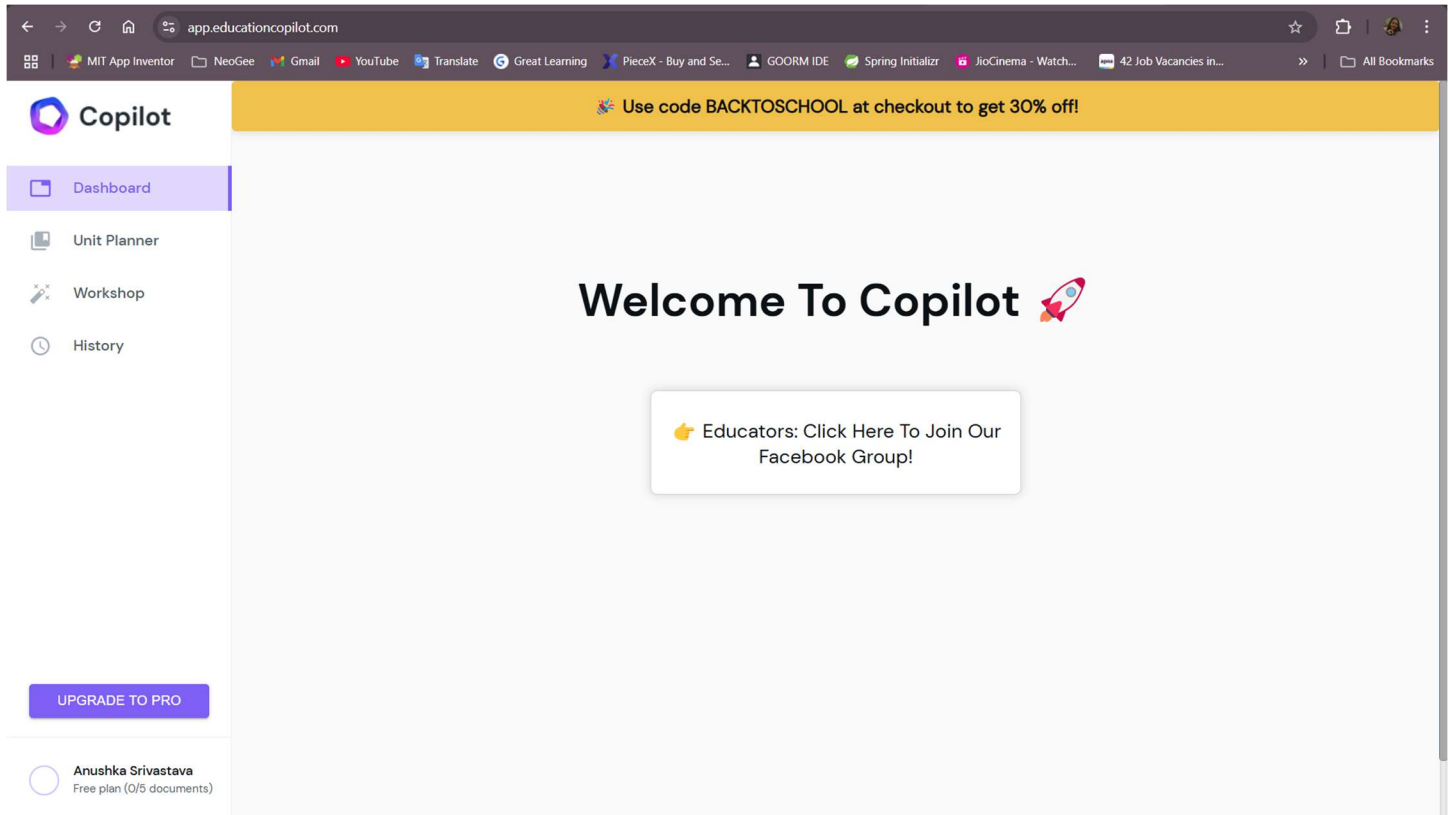

Key Features:
- Navigation Menu: Links to Lesson Planning, Educational Handouts, Tools, etc.
- Activity Summary: Displays recent activities and performance highlights.

Design Elements:
- Card-based layout for organized information.
- Visual indicators like progress bars and charts.

5. AI Lesson Planning

Objective:

Allow users to generate quality, structured lesson plans for any subject, lesson, or concept.
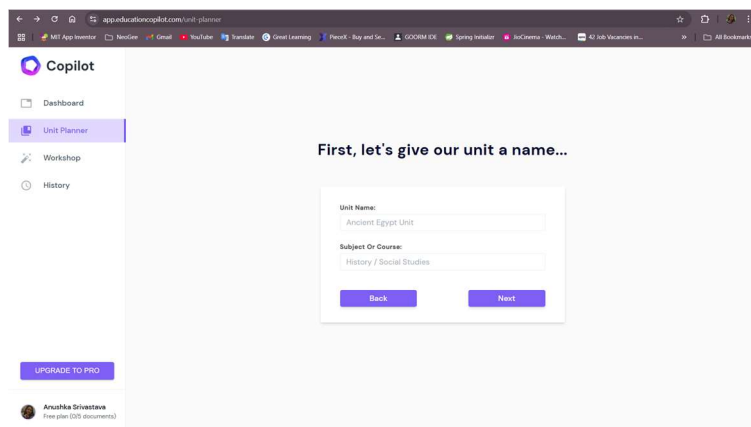

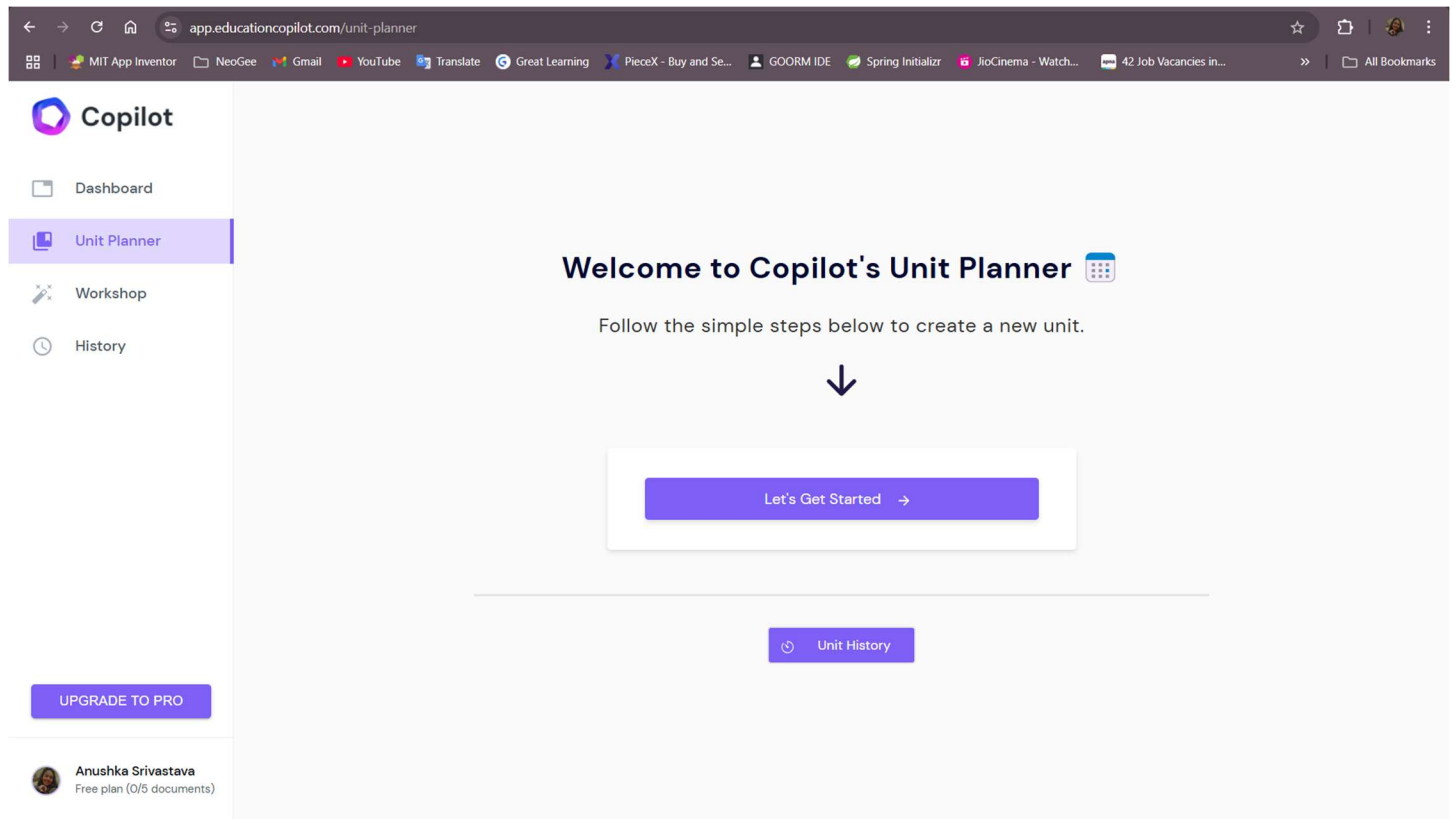

Now, let's provide some details for the AI to use...

This Unit Should Cover:

– Describe spreadsheet
– Types Of spreadsheet
– How to use spreadsheet (step by step)
– Advantages Of spreadsheet
– Examples

Standards / Objectives:

1. Give all information related to spreadsheet which is needed to know fully about spreadsheet.
2. Make information in points in every heading.
3. If Example needed then give the example.
4. Also add picture related to heading.

[Back]   [Final Step]

How many lessons should this unit include?

Unit Length:

[–]   1 lesson   [+]

[Back]   [• • • •]

Key Features:
- AI Lesson Planner: Generates lesson plans based on user input.
- Customization: Users can tailor lesson plans to specific needs.
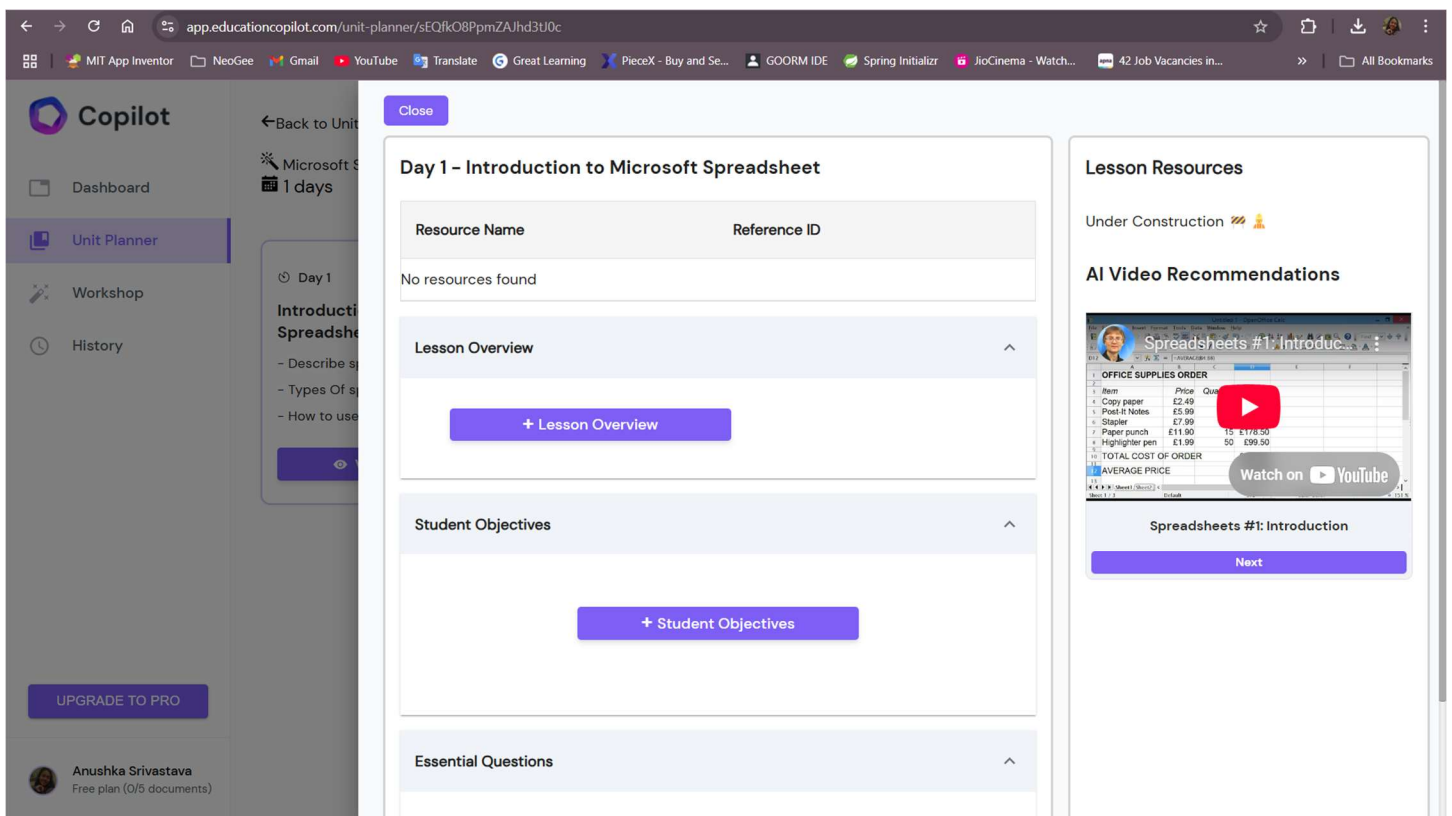

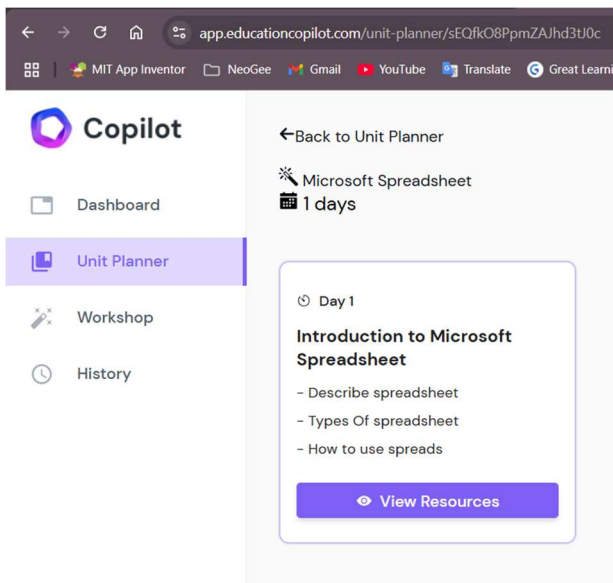

Design Elements:
- User-friendly interface with step-by-step guidance.
- Options for customization and personalization.

6. Educational Handouts

Objective:
Quickly generate handouts covering specific topics, concepts, or subject areas.

Key Features:
- Handout Generator: Creates handouts based on selected topics.
- Customization: Allows edits to tailor content to student needs.
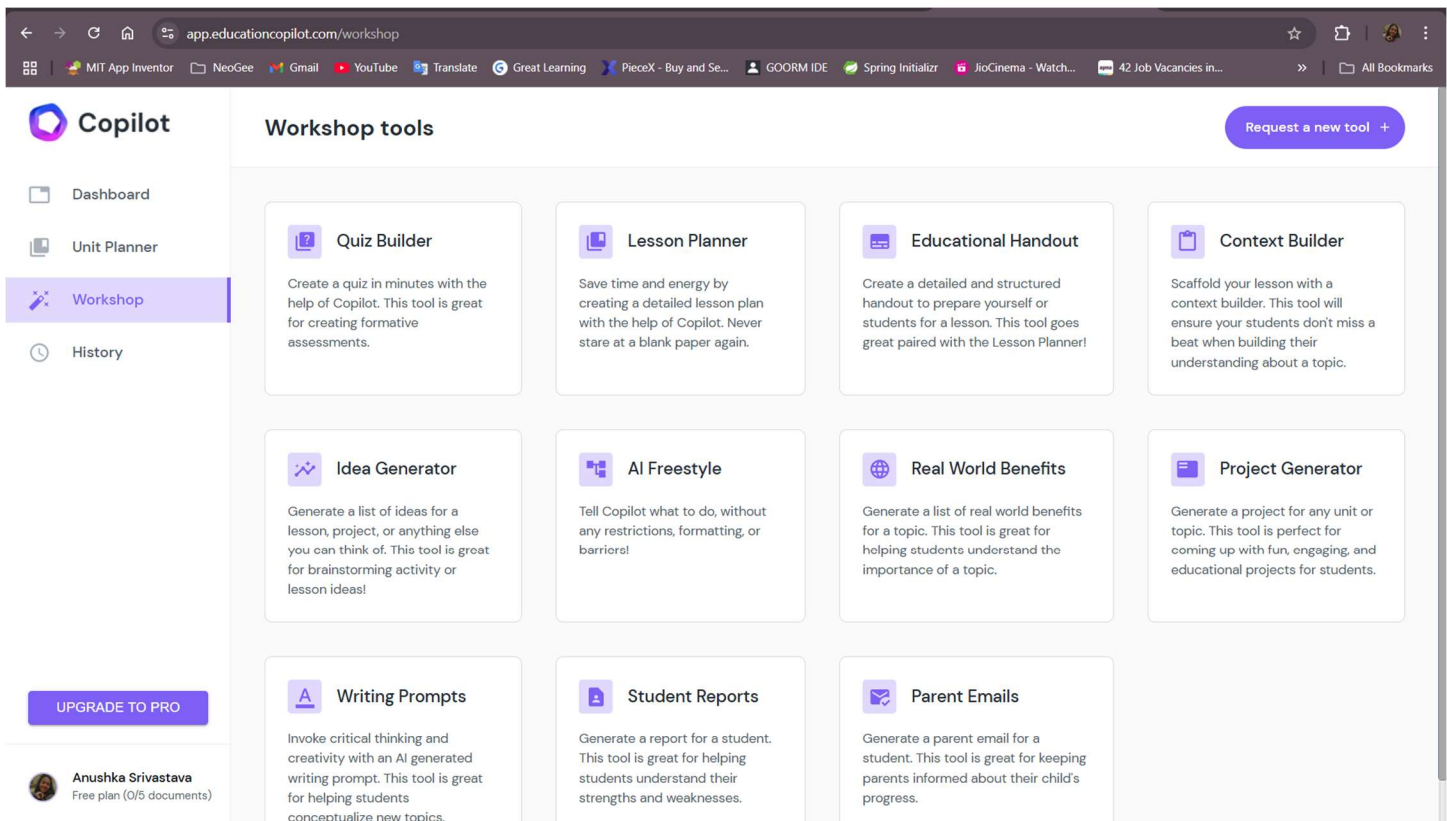

Design Elements:
- Clean layout with editable sections.
- Download and print options.

7. Additional Tools

Objective:
Provide over 10 tools to help save time in and outside of the classroom.

Key Features:
- Writing Prompts: Generate creative writing ideas.
- Student Reports: Create comprehensive reports on student performance.
- Project Outlines: Develop structured outlines for student projects.

Request a New AI Tool

Do you have a great idea for a new Tool that should be added to Copilot? We can create almost anything, no matter how complex. The more specific you are with your request, the faster we will be able to implement your idea. 🩹

If we do decide to add your tool, you'll receive special goodies!
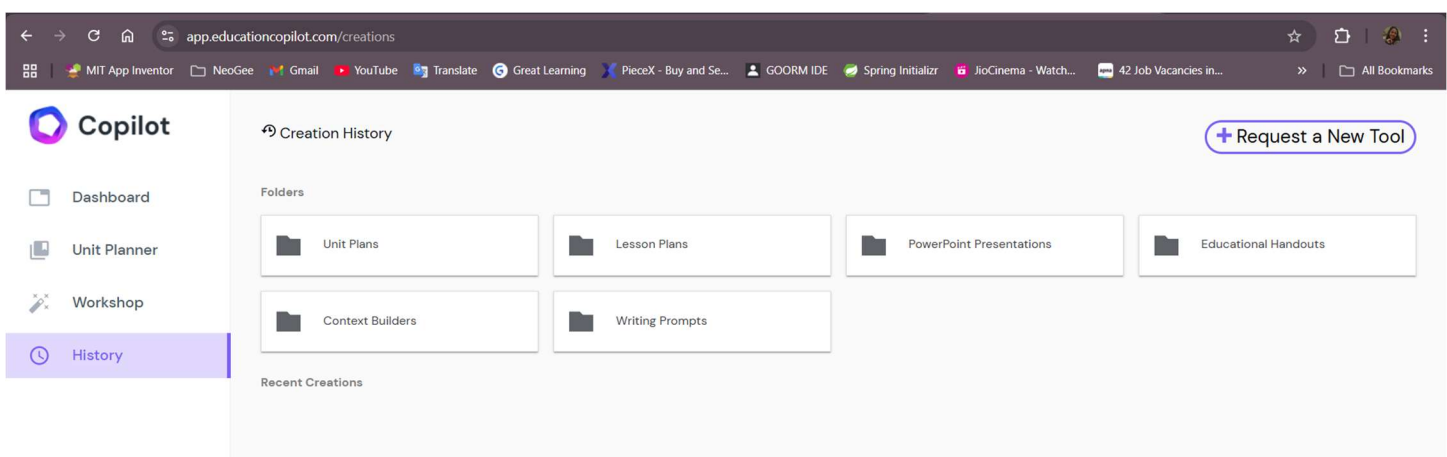

Name *

[   ]

Email *

[   ]

Please explain what the new AI tool should do in detail: *

EXAMPLE: The tool should generate a list of 10 vocabulary words based on a topic, word, or subject that is declared by the teacher. The tool should also define each word that is generates and then use that word in two different example sentences to help provide context.

Our Mission

Our mission is to provide educators with high-quality, AI-generated templates and resources that streamline lesson planning and preparation. We aim to save educators time and effort so they can focus on what matters most: their students.
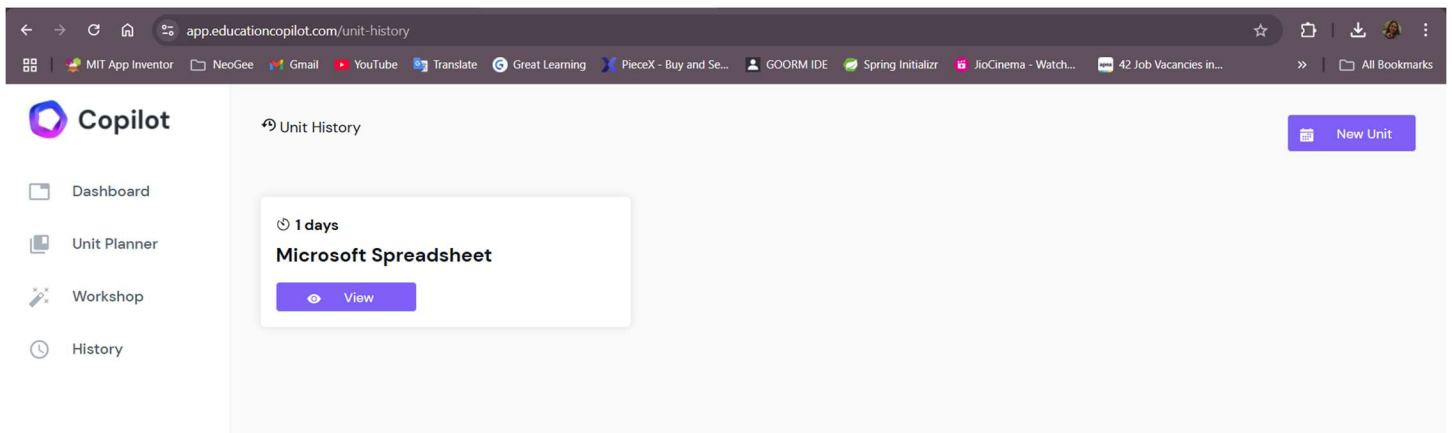

Design Elements:
- Accessible from the dashboard.
- Consistent design across all tools.

8. Testimonials

Objective:
Showcase user feedback to build credibility and trust.

Key Features:
- User Testimonials: Displays quotes from satisfied users.
- User Details: Includes names and, optionally, photos.

Design Elements:
- Carousel or grid layout for testimonials.
- Highlighting key phrases or feedback.

9. Contact and Support

Objective:
Provide users with assistance and resources.
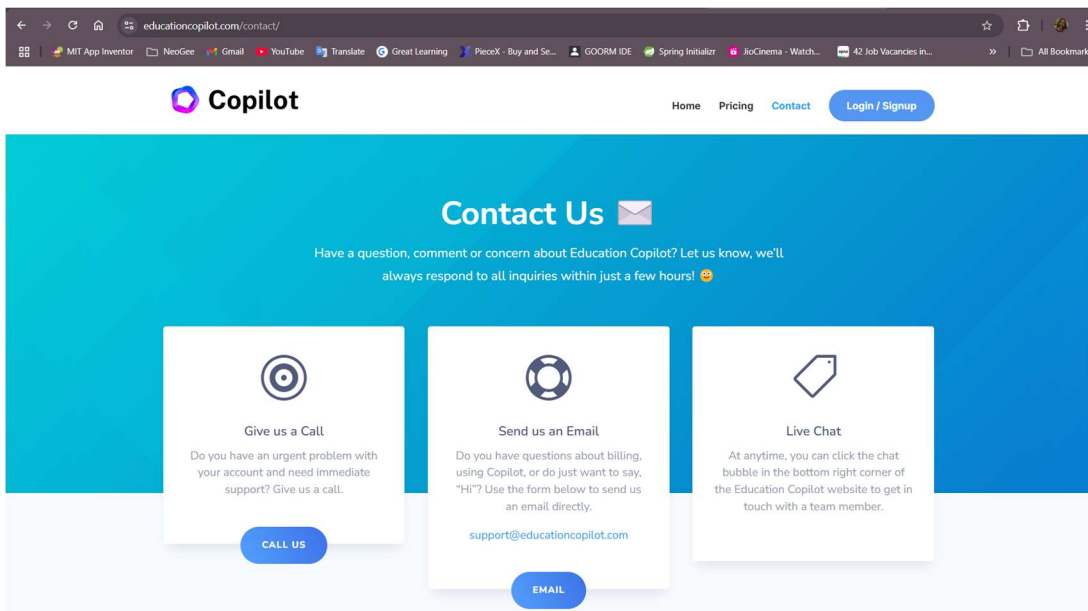

Key Features:
- Contact Form: Allows users to reach out for support or inquiries.
- FAQ Section: Answers common questions.
- Tutorials and Guides: Offers step-by-step instructions.

Design Elements:
- Organized knowledge base.
- Clear call-to-action buttons.

11. Pricing

Objective:

Inform users about subscription options and benefits.

Frequently Asked Questions

What grade level is this for?

Copilot works best for generating lesson plans and educational handouts for teachers with students in grades 4 and up.

How do I use Copilot?

To use Copilot, simply click "try for free" to access the sign up page. From there, you can give Copilot detailed instructions using any of the 10+ tools. Once you've generated your first AI lesson plan, go ahead and edit it to your liking and view it when needed in your output history.

Which subjects does this work for?

Copilot is capable of generating educational handouts, lesson plans, student reports, and lots more. If you can think it, Copilot can create it. This includes materials related to biology, economics, nouns and verbs, rocket science, astrodynamics, and even more complex subject areas.

Will I get unlimited usage?

Yes! All Copilot users get unlimited usage, storage and access to all AI tools. This means you can create as many lesson plans, handouts, etc as you'd like.
